SUMMARY

UI/UX designer with 7+ years designing products people have to get right the first time — a national deposit-return system, a cross-border health platform, e-commerce for household-name brands. My computer engineering background means I design in systems rather than screens, and I hand developers work they can build without guessing.

CORE SKILLS

Product design: Interaction design, information architecture, user flows, wireframing, high-fidelity UI, prototyping, responsive web design and mobile app design.
Design systems: Component libraries, semantic design tokens, multi-brand theming, light/dark modes, documentation and governance.
Accessibility: WCAG 2.2 AA contrast audits, focus and keyboard states, inclusive forms and error design.
Collaboration: Requirement gathering, stakeholder alignment, developer handoff, design specifications and revision cycle management.
Tools: Figma (Auto Layout, Variables, Tokens), Claude, Adobe XD, Miro, Zeplin, JIRA

WORK EXPERIENCE

Independent / Freelance
UX/UI Designer & Consultant | 2015 - Present

- Deliver design consultancy and end-to-end product design for mobile apps, web apps, dashboards and marketing sites, working with startups and agencies across sectors.
- Often serve as the sole designer: scope problems with founders and own discovery, information architecture, wireframes, high-fidelity UI, prototypes and developer handoff.
- I prepare designs for development by detailing interaction states, responsive breakpoints, design tokens, and expected behaviors. Drawing on the analytical thinking and problem-solving skills I gained through my engineering education, I support the development process and help resolve technical questions.

Atlastek / DIAS Group
Senior UX/UI Designer | Sep 2022 - Aug 2025 | Istanbul
Deposit Return System (DYS) - Turkiye's national recycling ecosystem

- Owned end-to-end design across three product surfaces: a consumer mobile app, physical deposit-machine screens and stakeholder dashboards.
- Designed a guided scan, verification and instant-refund flow for first-time deposit-machine users, reducing failed deposits in field testing.
- Built permission-based dashboards for TÜÇA (Turkish Environment Agency), Darphane (Turkish State Mint) and operators, making financial flows, device health and rule engines actionable.
- Established a shared component library and design tokens across mobile, web and kiosk, maintaining a consistent visual language and reducing handoff back-and-forth with engineering.

WORK EXPERIENCE (CONTINUED)

Extratik / Turkeyana Clinic
UX/UI Designer | Feb 2021 - Sep 2022 | Istanbul
Docnmore - global digital health platform

- Designed the patient-provider journey for an international patient base: clinician discovery, online and in-clinic booking, and secure video/chat consultations.
- Shipped tools for medical records, health history and prescription reminders, making clinical information understandable to patients.
- Delivered the clinic-side dashboard for real-time appointment flow and patient profiles, replacing manual scheduling for partner clinics.

Altosis Information Technologies
UX/UI Designer | Feb 2019 - Jul 2020 | Istanbul
Custom client solutions on a proprietary BaaS platform

- Led interface design for websites, admin panels and mobile apps, including work for Teknosa, Monster Notebook and Türk Telekom within each client's established brand system.
- Owned requirement gathering, high-fidelity wireframes, interactive prototypes, responsive UI and developer handoff; managed client revisions and translated business requests into design decisions.

Milk Lab34
UX/UI Designer | Jun 2016 - May 2017 | Istanbul
Kidofun - children's activity booking app

- Designed the parent-facing journey from discovery to paid confirmation, including secure in-app payment, booking history and planning flows.
- Built search and filtering by age group, interest and location to help parents narrow hundreds of activities to relevant options.

INDEPENDENT PROJECTS

- **Xyroxia | Design System Builder:** Building a web app for generating token architecture, type scales and component libraries, with accessibility auditing. Work in progress.
- **UX Map | Self-published Guide:** Authored a free-to-use guide covering 108 UX/UI terms across 12 chapters, with original illustrations and cited academic sources. vburakkeles.com/uxmap

EDUCATION & CERTIFICATIONS

- BSc, Computer Engineering | Fatih Sultan Mehmet Vakıf University | 2012 - 2019
- 15+ UX certificates | Interaction Design Foundation | 2019 - Present
  Certificate profile: ixdf.org/members/burak-keles

LANGUAGES

Turkish: Native | English: Professional working proficiency

SPEAKING & COMMUNITY

Design for Wearables: Workshop, GDG DevFest Edirne | Dec 16, 2017
What is UX Design?: Talk, GDG DevFest Bolu | Oct 25, 2017
Organizer: Google Developer Group Istanbul | 2015 - 2019
Board Member: FSMVU IoT Society | 2017 - 2019
